## 1. Why you are a good fit for this job & firm?

As I thank you first for the wonderful opportunity for me to get interviewed by your company. Your company will surely prove to be an excellent platform for me to establish my skills and improve knowledge in the software world. Even though I am a fresher,

I will assure you that I will give my best in all situations and work to my potential so that I can contribute as much as I can in the factor of growth and welfare of this company

I work both as a team player and individual worker

I have also worked continuously on my communication abilities and teamwork skills to my best, which I will put to use in my future career, which would be in your company if I am selected for the position.

I am a fast learner so learning new technologies will be easier and adapting to it can improve my ability to cope up with the changing software world. New technologies release every new day. I frequently update myself to the new technologies to the market.

So, I feel that I would be a perfect fit for the software world and the position. I feel that I should be hired by you given my good academic background along with the skills and knowledge the company is looking for.

I have the good knowledge and the attitude to excel. If I get a chance, I will surely work towards building my expertise, in which I would prove beneficial for me as well as your company. I am more interested toward learning new things and technologies and getting more new experience in real world problems.

## 2. Describe why this job is a good fit for you?

Software career is my choice of career because it is a perfect fit for the software world and the position to both computer applications and systems.

This is the job that serves my curiosity and enhances my interest to move forward in my career. Interest is the major factor to pick a job and improve in it. So I earn it. So it makes this job fit for me. This makes me to work in the area or areas that interest me most.

Software job is incredibly broad to work with. We can work in multiple aspects of the project development cycle. I like to work as a team. Team work plays an important role in creating software services and products.

Another important area where my interest is in Troubleshooting where this job also serves my interest. This is the job where I can grow along with the speed of world growth without lagging at the past. These are the reasons why this job fits me.
